7.3.1 Describe/Explain the performance of the institution in one area distinctive to its vision, priority and thrust

TREE PLANTATION

Every year, Our College will organize a tree plantation programme at different schools and villages. A tree planting programme was held in our college to commemorate both the World Environment Day on June 5 and Abdul Kalamalam's birthday on October 15. We have conducted more than 100 programs on this occasion over the past five years. There are 100 students and faculty members participating in this program. Additionally, some local municipal department officers participate in the program voluntarily. They guide us on how to plant a sapling properly. The aim of the program is to plant many saplings on the college campus and nearby local areas. Students at the college created posters and banners about the importance of establishing trees. So that people know the importance of tree plantation. The principal of our college delivers a passionate speech on the topic of Environment Day. Tree plantation is an activity that we can all participate in for improving our environment. Trees play a significant role in ecological balance and equilibrium, and by protecting trees and growing more trees we can ensure the health of the ecosystems, Planet Earth is home to man, and millions of other terrestrial and aquatic life forms. The Earth is able to sustain all life forms. The Earth has air for the life forms to breathe, as also water and vegetation. These natural resources help life forms live on Earth. The plants and trees that grow on Earth are valuable to all life forms.

New Heights Old Tradition

The edible roots, stems, leaves, flowers, fruits and seeds are food for man as also for all herbivorous animals and birds. Trees are habitation to many wild creatures. Birds build their nests in trees. Reptiles and insects also live on trees. Forests are home to many large wild animals like the tiger, lion, rhinoceros and elephant etc. Trees and forests also help in maintaining the hydrological cycle. They help in maintaining rainfall patterns and monsoon cycles. Trees are useful in making environment pollution free. Destroying forest cover causes an accumulation of greenhouse gases that causes a rise in the temperature of the atmosphere. This leads to the harmful effects of global warming and climate change. Trees are therefore to be protected, and tree plantation helps in increasing the green cover.

Recently 06.02.2023 we planted 108 vilvam trees in our college on Shivratri that
